

**Abstract**

Electronic module and method for the production thereof

The present invention relates to an electronic module (25) and a method for the production thereof. The electronic module (25) has a plurality of components (1-6) arranged on a wiring block (9). The wiring block (9) has a plurality of outer sides (11-14) and has in its volume lines (15) interconnecting contact pads (10) on the outer sides (11-14). The contact pads (10) are electrically connected to component connections (7) of the components (1-6).
